L17 ANSWER 1 OF 1 ZCAPLUS COPYRIGHT 2004 ACS on STN
2000:535397 Document No. 133:122801 Single component sulfur-based cathodes for lithium and lithium-ion batteries. Pope, John; Buttry, Dan; White, Shannon; Corcoran, Robert (Blue Sky Batteries, Inc., USA). PCT Int. Appl. WO 2000045451 A1 20000803, 48 pp. DESIGNATED STATES: W: JP, US; RW: AT, BE, CH, CY, DE, DK, ES, FI, FR, GB, GR, IE, IT, LU, MC, NL, PT, SE. (English). CODEN: PIXXD2. APPLICATION: WO 2000-US2445 20000131. PRIORITY: US 1999-PV118068 19990201.

AB The cathode materials of concern are the conducting polymer or backbone and the redox active species or sulfur species. The selection of the materials is based on the characteristics of the materials relating to the other components of the batteries and to each other. The present invention also pertains to the resultant cathode materials, particularly a selected cathode material of a single component sulfur-based conducting polymer with the sulfur species covalently linked to the conducting polymer, and most particularly a thiophene based polymer with covalently linked sulfur species. The conducting polymers have been covalently-derivatized with sulfides and/or sulfide-containing groups as battery cathode materials. The present invention also pertains to a battery employing the selection method and resultant cathode materials.
